Integrated and Coordinated Care Across Four Practices

In addition to our Primary Care Practice, the Health Center offers prenatal, dental and behavioral health care. Whether your child needs a dental check-up or you are expecting a baby, the Health Center is here for you and your family. For details, visit www.GPWHealthCenter.org.

Prenatal Care

From the moment you learn you are expecting a baby until the arrival of your newest family member, we offer personalized and professional prenatal services. Ask about the Health Center’s CenteringPregnancy™ Program for women with similar due dates. Our Prenatal Practice includes Obstetrician/Gynecologists, Certified Nurse Midwives, Family Nurse Practitioners and Medical Assistants.

Dental Care

Regular dental care is a vital part of your family’s good health. Our Dental Practice operates in new facilities, with an experienced team of Dentists, Dental Hygienists and Dental Assistants. We specialize in child-friendly dental care. From prevention to exams, fillings and other dental procedures, we make your child feel comfortable in our dental suites.

Behavioral Health Care

Our Behavioral Health Care Practice can help improve your family’s quality of life by working with you through times of stress, depression or serious illness. Our brief, solution-oriented therapy provides immediate, practical solutions for issues that are affecting your life and your health. We even offer ADHD and depression screening services.
